What is \$NEY?

Menino Ney Token (\$NEY) is an BEP-20 utility token on the BNB-Smart-Chain blockchain that serves as the digital currency.

The fan token was created with the aim of bringing the community together and attracting a global audience, facilitating interaction with the football player.

Decentralized

As it is a decentralized token, the coin holder is the true owner of their own virtual money, not depending on government corporations to carry out any transactions.

It works through blockchain technology that allows you to create payment systems, carry out financial transactions and obtain loans without the need for intermediaries.
